

KNIFE GATE VALVES

Knife gate valves have a leaf-shaped shutter with a sharp edge similar to a guillotine for shutting off viscous, powdery media, pulps, sludges and sewage.

AV05-442

AV05-471

TYPE	Nominal diameter	Nominal pressure	Operating temperature
AV05-442	DN 50-700	PN 2/3/5/7/10/16/25	t° to +90 °C
AV05-471	DN 50-400	PN 10/12/14/16	t° to +90 °C

ADVANTAGES

- Reliable flow shutdown
- Modular design
- Wide range of applications
- Possibility of producing different sealing ring types
- Significant increase in operating time
- All types of drives and automation
